Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 28-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 28 recites the limitation "the vocal valve member" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Blom et al US Patent 4,911,716.

Blom et al discloses a vocal valve (32) comprising an air passage (24), a check valve member (28) and a manually adjustable member (26) comprising a housing (see Fig. 2, cylindrical member covering check valve 28). The housing encloses the vocal valve member (the vocal valve member has been interpreted as the leaflet that made the check valve 28) and the

Art Unit: 3738

housing is rotatably mounted to a bottom plate (46, the Examiner interpreted the bottom plate as the curved region 46). See attachment.

Claims 27 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Tabor US Patent 3,137,299.

Tabor discloses tracheotomy valve (1) comprising an air passage (see Fig. 2), a check valve member (29) and a manually adjustable member (12) comprising a housing (see lateral wall of cap 12, see Fig. 2). The housing encloses a vocal valve member (5) and the housing being rotatably mounted to a bottom plate (7).

NOTE: the housing is rotatable mounted into element 7 before it get fixed to apertures 10 & 11.

Allowable Subject Matter

Claims 29-37 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
